FunAway is a user-engaging platform to launch a local-activities search portal.

Features List

Fun Away

Local-activities Search Portal

─┤ Features List ├─

Introduction

FunAway is a user-engaging platform to launch a local-activities search portal. In the current market dynamics, the biggest hassle for a traveler is the lack of knowledge about the local attractions. Using FunAway, one can easily launch a website that offers all the information about local attraction, activities and tours.

FunAway takes into account all the key ingredients required for a local activity search platform and offers a user engaging solution that is easy to implement. The platform lets you build a local-activities search portal where local guides add their activities and interested consumers browse those activities and choose the one that suits them the most. Overall, it is a formidable package with advanced feature set and easy to implement functionality.

Frontend Key Features

- It's a marketplace, where travelers can easily connect with hosts.

- The overall design of the marketplace is responsive and user friendly.

- SEO friendly URLs (Structured as per the ethics of Google; Having high prospects of search engine rankings).

- Unlimited* number of categories and activities listing

  (Our script does not limit the number of categories or activities but beyond a certain number, you will need a more powerful server/hosting service and may be some optimization into the scripts and database also as the database size and concurrent users count increase.)

- Free* Sign up for both hosts and travelers

  (We can also provide an option to convert free membership into paid at additional cost)

- Users can sign up via Facebook, Twitter and LinkedIn.

- Easy profile management for hosts and travelers
